By clicking on Read It, students are directed to the appropriate section of their eTextbook covering that topic.

Sample eTextbook reading experience

Focus on Factoring a Common Binomial Factor

Factor: $y(x + 2) + 3(x + 2)$

Solution

$y(x + 2) + 3(x + 2)$ • The common binomial factor is $x + 2$.
$= (x + 2)(y + 3)$

Students can take notes, highlight content, make bookmarks, and print pages to use for studying.

✓ Check Your Understanding 3

Factor: $a(b - 7) + b(b - 7)$

Answer ⬇

Questions in the print textbook that have student-facing answers are available right within the reading experience.

▶ Video: Factor the Expression Using Factoring by Grouping - I

Ex. Factor completely.

$5x - 15 + yx - 3y$

$\underline{5x - 15} + \underline{yx - 3y}$

$= 5(x \; ?)$
